STAND-BIASED

The stand-biased approach to sit/stand workstations. By raising your desk to standing height and your chair to stool height you can have the benefits of both sitting and standing without the hassle of switching between the two.

SIT/STAND

Research has shown that it is important to alternate between sitting and standing throughout the workday. Creating movement by utilizing a sit/stand workstation can reduce the risk of heart disease, diabetes and stroke while also creating a healthier work environment. From height adjustable workstations to converting a current workstation, Neutral Posture's product portfolio includes solutions to meet all the sit/stand needs of any office landscape.

**Lower BMI and
Blood Pressure**

Risk of Heart Failure

12% – 28% Decrease

Risk of Diabetes

93.9% Decrease

Risk of Stroke

12.5% – 20% Decrease
